Week 7: Science

11

English for Teenagers

Intensive Course

An intensive English language and educational activity course (28 lessons per week). This course is aimed at the more academic student, aged 14-16 years old, who may wish to go on to take English exams.

With CLIL content in the lessons and weekly themed activities, this is a unique and intensive course for keen learners. CLIL is a method of teaching and learning which provides English language practice whilst studying other topics such as geography, history and science.

Classes

Your son/daughter will study in a lively international atmosphere with others whose levels of English are similar. Your son/daughter will be taught by a team of two or three teachers, who encourage participation and interaction between members of the group - and English will be the only language used!

Course Content

The lessons will be stimulating and effective, with a variety of activities to develop your son/daughter's confidence, knowledge and skills:

- lively presentation and practice of new language
- rapid development of oral fluency, accuracy and conversation skills
- systematic development of listening, reading and writing skills
- extension of vocabulary, structure and usage

Educational Activities and Excursions

In addition to excursions, on-campus educational activities allow a change of pace, following weekly themes such as film-making, music, fashion, drama, design, information technology and science. These activities include practical experiments, challenges, presentations and performances, all of which require collaboration and the use of integrated skills and introduce new vocabulary. These activities are led by teachers, who monitor and correct the students' English.

Safety and Student Support

The safety and wellbeing of our students is one of our top priorities.

Anglo-Continental has fully trained staff and facilities to provide a high standard of student support, safety and first aid.

Anglo-Continental operates a 24/7 helpline for emergencies.
